JavaScript Lecture-2

Pop-Up Boxes

i) alert

ii) prompt

iii) confirm

What is Operator?

There are five type of operators.

Arithmetic Operator ➔ **+ , - , * , /**

Assignment Operator ➔ **+= , -= , *= , /=**

Comparison Operator ➔ **< , > , <= , >= , == , === , !==**

Logical Operator ➔ **&& , || , !**

Increment/decrement ➔ **++ , --**

Comparison Operator:

== ➔ Equal to

!= ➔ Not Equal

=== ➔ Equal Value and Equal Data Type

!== ➔ Not Equal Value & Not Equal Data Type

AyeshaTheCoder

> ➔ Greater than

< ➔ Less than

>= ➔ Greater than or Equal to

<= ➔ less than or Equal to

Logical Operator.

&& ➔ Logical "AND"

|| ➔ Logical "OR"

! ➔ Logical "NOT"

Students Task JavaScript Lecture-2

Q1: Prompt the user to enter two numbers? perform the following Arithmetic operators on these number.

Q2: Create a Calculator that takes user input for a number, allow selecting an Arithmetic Operator, & display the result using a Switch Case?

Q3: Create a Simple Mark sheet that takes a user input & display the student marks?

Q4: Print "You can Drive" or "You can Not Drive" Based on age being Greater than 18 using Comparison Operator
